## 1 Introduction

## 2 About Theorem environments

**Theorem 2.1.**

**Assumption 2.2.**

## 3 About Table and Figure environments

Figure 1: An Example Figure

*Note:* This note is generated by the `figurenotes` environment. It automatically sets the font size to `footnotesize` and aligns the width with the container.

## 4 About bibliography

This is how to cite: [Dell \(2025\)](#) and ([Dell, 2025](#))

Table 1: An Example Table with Custom Source Label

Variable	Coefficient	Std. Error
Intercept	0.45	(0.12)
Treatment	2.34***	(0.56)
Control	-0.11	(0.05)

*Source:* Generated from simulated data. \*\*\* indicates significance at the 1% level. The optional argument `[Source]` replaces the default "Note".

## References
